

Mangoboost — Inference Provider Evaluation

AMD ISV Partnership Team · Inference Provider Evaluation Framework v1.0

Model	Base URL	Evaluation Date	Input Price
minimax/MiniMax-M3	https://api.mangoboost.io/v1	2026-09-25	\$0.29/1M tokens
Output Price			
\$1.20/1M tokens			

4.92

out of 5.0

Recommend

Weighted composite score across 4 evaluated categories.

Overall Scorecard

 Inference Performance	25%		5.0 / 5.0
 Reliability & Availability	20%		5.0 / 5.0
 Output Quality & Safety	8%		4.3 / 5.0
 Cost & Economics	12%		5.0 / 5.0
Total Weighted Score	100%		4.92 / 5.0

API compatibility, security/compliance, and support scores require manual assessment — see the **Evaluation Framework** for rubrics and due diligence checklist.

1 — Inference Performance & Latency

Score: 5.0 / 5.0

213.4ms

4 — Cost & Economics

Score: 5.0 / 5.0

88.3%

Savings vs GPT-4o

\$72.6

Provider/month (class., 1M req)

\$622.5

GPT-4o/month (same workload)

5 — Manual Assessment Required

The following categories require vendor documentation review and/or direct conversation with the provider. Use the scoring rubrics in the **Evaluation Framework** document to complete these scores.

CATEGORY	WEIGHT	ITEMS TO ASSESS	SCORE
API Completeness & Compatibility	15%	Tool calling, JSON mode, model pinning, batch API, SDK	___ / 5
Security & Compliance	15%	SOC 2, data retention policy, encryption, SSL cert, GDPR DPA	___ / 5
Cost (commercial terms)	(12%)	Volume discounts, rate limit documentation, contract terms, SLA credits	___ / 5
Support & Operations	5%	Support SLA, status page, deprecation policy, TAM availability	___ / 5
